Pumiced

Bushhammered

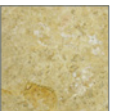

Shagreen

Pinwale

Splitface

Tumbled

Warm gold and earthen beige tones dominate this extraordinarily versatile limestone. The fossil-rich patterning of the stone is wonderfully active on an intimate scale, yet consistent from piece to piece when installed. The extremely dense and freeze-thaw resistant nature of Fiore Gold makes it ideal for a wide range of applications from interior and exterior paving, pool copings, vertical wall veneer and caps, and custom carved applications.
