Natural Cleft

Tumbled

Taupe, grey, and gold hues combine to give this natural cleft sandstone an earthy warmth and beauty that is well-suited for landscape projects with a slightly more rustic and natural aesthetic. This adaptable sandstone is available in paving formats ranging from flagstone and chopped or sawn-to-size paving to sorted thickness wall caps, coping, and stair treads. It is also available as a handsome ledge stone, web-wall, or cut ashlar veneer that can be used in drystack garden walls and building veneer alike.
